

DISOLA POWER Series

“Air-conditioner Free” Realized
by Salt-resistant Enclosed Structure!

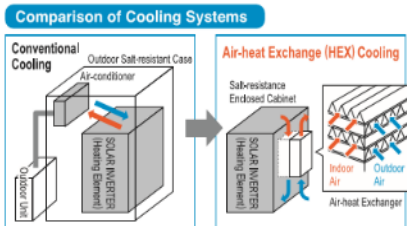

500kW

Outdoor “Air-conditioner Free”
SOLAR INVERTER

DISOLA POWER
500HV-HEX

-Realizes industry-leading 98.8% conversion efficiency
(1,000kW, 500 kW).

-Industry’s first air-heat exchange (HEX) cooling system (air-conditionerless system). Greatly improved energy conservation effect compared with conventional air-conditioning system.

-Minimum number of replacement parts required (long-life parts used for a main No dust-proof filter required owing to the enclosed structure).

-Installable in an area subject to salt damage owing to a highly weather-resistant stainless- Steel enclosed cabinet.

DISOLA PACK NEO

High-efficiency,Space-saving Next-generation Package

500kW | 1MW | 1.5MW | 2MW

SOLAR INVERTER

- Realizes 98.8% maximum efficiency (industry-leading high efficiency).
- No air-conditioner required owing to the salt-resistant enclosed structure by the air-heat exchange (HEX) system (great energy conservation effect).
- Stainless-steel enclosed cabinet (excellent Weather resistance).
- Long-life parts used for a main circuit (minimized replacement parts).

SMART SOLAR TRANSFORMER

- Streamlined version of the conventional booster transformer for solar power generation
“Solar Transformer”
- Greatly reduced installation time owing to workability-oriented design.
- Capable of measuring an oil temperature to monitor the transformer condition (optional)
